

Public Toilets in Delhi

A Status Survey

act:onaid

Introduction

On the occasion of the World Toilet Day on 19th November 2016, ActionAid India started a campaign on public toilets in cities, focusing on the problems faced by women due to the absence or inaccessibility of public toilets. The campaign was based on the understanding that a sustainable and just city includes access to safe and healthy sanitation as a basic right for all citizens. Providing public toilets thus is a basic component of city services, and its provision an integral part of urban planning and development. The provision of public toilets is part of the **Swacch Bharath Abhiyan (SBA)** that calls for creating a larger number of public toilets in the cities of India. According to the guidelines of the SBA: "Public toilets are provided for the floating population / general public in places such as markets, train stations or other public areas, where there is a considerable number of people passing by." Following are the norms mentioned for the services in the public toilets. The norms also speak about ensuring access for women, transgender persons and persons with disability (PwD).

	S. No.	Sanitary Unit	For Male	For Female (A)	
	L	Water Closet	One per 100 persons up to 400 persons; For over 400 persons, add at the rate of one per 250 persons or part thereof	Two for 100 persons up to 200 persons; over 200 persons, add at the rate of one per 100 persons or part thereof	
Public Toilets	ii.	Ablution Taps	One in each W.C.	One in each W. C.	
- Norms for toilet seats	iii.	Urinals	One for 50 persons or part thereof	Nil	
tonet seats	iv.	Wash basins	One per W. C. provided		
	Source: Manual on Sewerage and Sewage Treatment Systems, 2013 Part A Engineering Note: i) It may be assumed that two-thirds of the number are males and one- third females ii) One water tap with drainage arrangements shall be provided for every 50 persons or part thereof in the vicinity of water closet and urinals. * At least 50% of female WCs may be Indian pan and 50% EWC iii) Separate seat may also be provided for trans-genders				

Source: Government of India, Ministry of Urban Development (2014) Guidelines for Swachh Bharat Mission (SBM) pp 35-36 http://www.swachhbharaturban.in:8080/sbm/content/writereaddata/SBM_Guideline.pdf)

The guide lines also mention having treatment units such as:

- 1. Bio Digester with reed bed systems/ soak pits,
- 2. Bio Tank,
- 3. Septic Tank with Soak Pits.

As part of ActionAid campaign it was decided to commission a Primary Survey of Public Toilets in Delhi.

^{1.} Government of India, Ministry of Urban Development (2014) *Guidelines for Swachh Bharat Mission (SBM)* pp 35-36 http://www.swachhbharaturban.in:8080/sbm/content/writereaddata/SBM_Guideline.pdf)

Objectives of the Survey

The objective of the survey was to make an assessment on the:

- Availability of public toilets in the city for men and women/ to understand if there is a gap between the demand and supply of public toilets, especially for women.
- The status of available public toilets in the city of Delhi, and in this context the main parameters that were looked into were:
 - 1. The visibility and accessibility of toilets
 - 2. The infrastructure and maintenance (both the premises and individual toilets)
 - 3. Public toilets from Women
 - 3a. Basic Amenities in public toilets for women
 - 3b. Safety and security in public toilets for women

Methodology

Data Collection

Based on the parameters mentioned above, a quantitative survey form mainly with 'Yes' or 'No' questions was prepared (attached as annexure 1). A team of surveyors drawn from civil society organizations including Aarth Astha, Action India, Jan Pahel and FORPA as well as student volunteers from different institutions across Delhi conducted physical verification of toilets using the questionnaire in different districts of Delhi. In addition, survey teams conducted informal interviews with users of public toilets. The survey was conducted in December 2016.

Data Analysis

Once the survey was completed, data collected was digitised with the same format as on the survey questionnaire. Percentage data of answers to each question were then calculated and analysed.

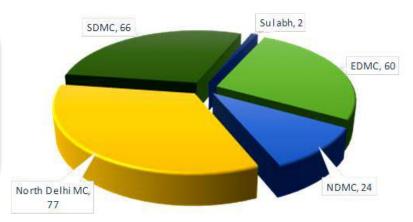

Challenges and Limitations

A formal RTI request was submitted to each of the municipal corporations namely NDMC, North Delhi MC, EDMC and SDMC regarding the number of toilets under each corporation as well as their locations. Apart from NDMC, none of the MCDs responded to the request. Due to this, surveyors had difficulty locating toilets and therefore divided responsibilities amongst themselves to survey at least 20 toilets in each of the 11 district of Delhi based on random sampling.

Due to lack of information while conducting the survey, particular details in many survey forms were left blank or was missing. This became a challenge during data analysis and in the depiction of accurate in the depiction of data. However, the findings shown in this report are accurate as they are based on complete data.

229 Toilets Surveyed

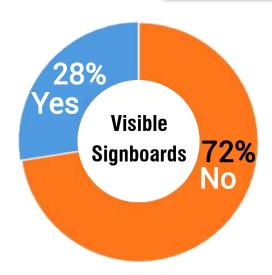

The 229 toilets surveyed were maintained by the three Municipality Corporations of Delhi (MCD), the New Delhi Municipality Corporation (NDMC) and by private agencies to whom maintenance services were outsourced.

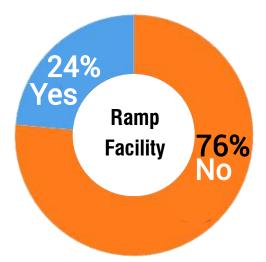

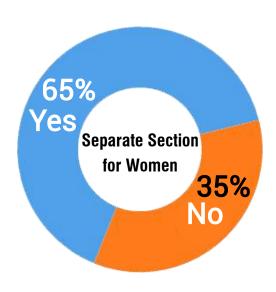

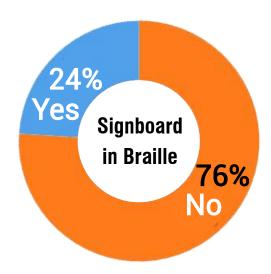

Findings

1. Visibility and Accessibility

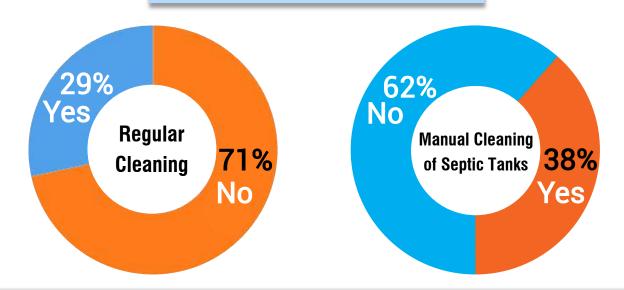

Key Findings related to Visibility and Accessibility:

- Over 72% of the toilets lacked visible signboards.
- ♦ 76% had no ramp facility making it hard for people with physical disability and the elderly to access public toilets.
- 35 % of surveyed public toilets in the city did not have separate sections for women.
- Nearly 76% did not have signboards in Braille language, making it hard for people with visual disability to access public toilets.

2. Infrastructure and Maintenance

Key Findings related to Infrastructure and Maintenance:

- The survey revealed that more than 71% of the toilets surveyed were not cleaned regularly. Cleanliness was also a major issue for toilet users who were interviewed during the process of the survey.
- Septic tanks of nearly 38% of the toilets are cleaned manually.

3. Public Toilets for Women

With regard to women's toilets, 149 toilets out of the 229 toilets surveyed had some provisions for women but functional issues like cleanliness lack of hygiene and safety measures were found to be the key concerns.

(All percentages in this section are calculated on 149 women toilets surveyed)

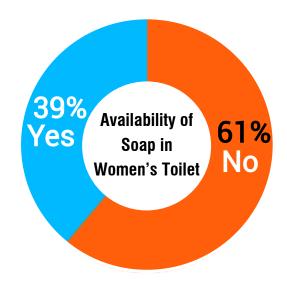

2 out of 3 surveyed toilets had no separate provisions for women.

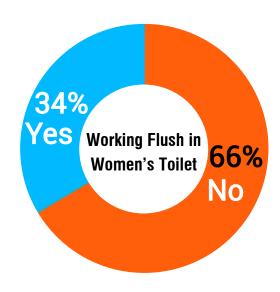

3a. Basic Amenities in Public Toilets for Women

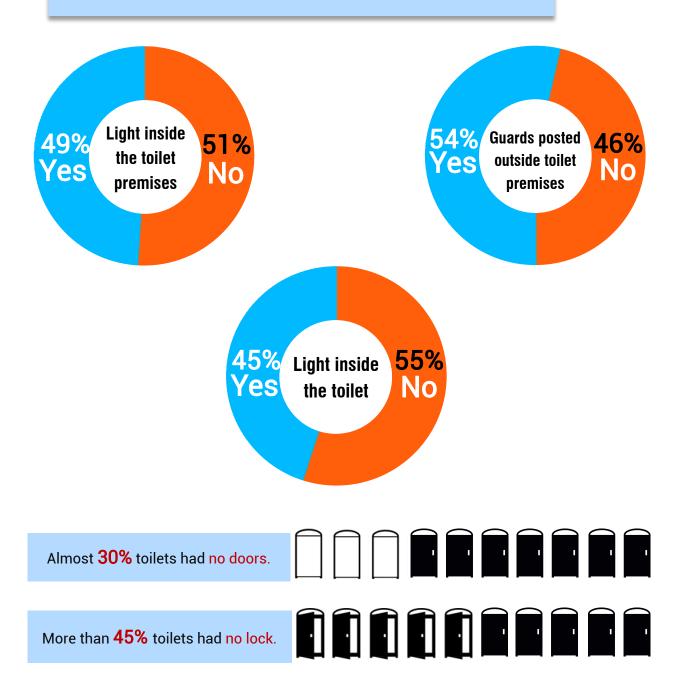

Key Findings related to basic amenities in Public Toilets for Women:

- More than 66% women's toilets did not have a working flush.
- 53% did not have running water facility.
- Over 51% did not have facility to wash hands.
- About 61% toilets did not have soap to use, which raises a concern regarding quality of public sanitation available for women.

3b. Safety and Security in Public Toilets for Women

Key Findings related to Safety and Security in Public Toilets for Women:

- Over 50% of the women's toilet did not have lights -- neither inside the toilet nor in the outer premises.
- ◆ 46% of toilets were found unquarded
- Almost 30% toilets did not have doors.
- More than 45% toilets did not have mechanism to lock from inside.

Key Recommendations

- There should be stocktaking of all public toilets in Delhi to see how they comply with the SBA guidelines and necessary action needs to be taken to ensure compliance. Similar stock taking in major urban centers of the country.
- More toilets for women should be built, as the number of toilets for men and women are not proportionate and nor are they adhering to the provisions mentioned in the SBA guideline.
- There should be provision of 24x7 guard facilities for women toilets as safety has been found one of the biggest concerns when it comes to women's toilet.
- There should be adequate provisions for ramps, instructions in Braille, special toilet seats for PwD in every toilet unit – to increase access to PwD and the elderly.
- The practice of manual cleaning should be stopped and other forms of disposal should be promoted such as Bio Digester with reed bed systems/soak pits, Bio Tank, Septic Tank with Soak Pits.

Artist: Mir Suhail | ActionAid #Where2Pee is a drive to see how the availability and accessibility of public toilets fits within a People's Vision of the City, a campaign by ActionAid India

Annexure I Survey Format

Name of the surveyor: Name of the Area: Number of ward: Location/Area (also indicate district): Toilet managed by: I Accessibility:	
A) To be filled by the surveyor upon inspection of	of the toilet
Is there a proper approach road to the toilet? Is there a ramp facility? Who was managing the public toilet	Yes or No Yes or No MCD/ NDMC/staff/contract staff, Other
Estimated number of men users (each day) Estimated number of women users (each day)	Ottle1
Was the toilet signboard visible from a distance? Is the signboard also in Braille? Are the letters/words visible? Number of toilet seats for men and women	Yes or No Yes or No
Transcr of torrect seats for men and women	Men Women No separate seat
What is the User Fee for (Men) What is the User Fee for (Women)	
B) Information to be sought from user	
Are you a regular user of this toilet? If yes, why?	Yes or No
Do you always find the toilet clean?	Yes or No
II Basic Facilities and Amenities:	
A) To be filled by the surveyor upon inspection of what 3) B)	of the toilet (Yes 1, No 0, Some
